Implementation Date: On or after December 2017

Description of Network Changes Planned:

The purpose of this Network Disclosure is to provide information on the Whiteville Wire Center (WHVLTNMTRS0) Transfer Project and Dial with Dial plans. AT&T Tennessee is replacing the existing Siemens RCU end office switch with a new Genband G5 Line Gateway. This change will require all working lines in the WHVLTNMTRS0 (218 Sycamore St Whiteville TN, 38075) Siemens RCU switch to be migrated to the new WHVLTNMTRPA Genband G5 Line Gateway switch hosted from the Memphis Main MMPHTNMADS0 (201 Court Ave Memphis TN, 38103) host location. The existing switch, WHVLTNMTRS0, will be Dial with Dialed to a remote switch, WHVLTNMTRPA, in the 4th quarter of 2017.

Currently, WHVLTNMTRS0 homes on the MMPHTNMA84T (Memphis Main) for FG B, FG D and INTRA (LATA) tandem functions. The new WHVLTNMTRPA remote location will home on the MMPHTNMA84T for FG B Tandem, FG D Tandem, and INTRA (LATA) Tandem functions as does its future MMPHTNMADS0 host office.

The WHVLTNMTRS0 RCU switch currently homes on the MMPHTNMA84T (Memphis Main) Operator Services Tandem. The new WHVLTNMTRPA switch will also home on the MMPHTNMA84T (Memphis Main) Operator Services Tandem.

Existing CLLI Code: WHVLTNMTRS0 (RCU)
Existing Point Code: none

New CLLI Code: WHVLTNMTRPA (G5)
New Point Code: 252-122-009 (same as Host – MMPHTNMADS0)

WHVLTNMTRS0
LATA: 468

NPA: 731 and 901

NXX*: 254 and 231 (*valid as of 04/10/17).

Description of Reasonably Foreseeable Impact of the Planned Changes:

AT&T Tennessee, Independent LECs, Wireless Service Providers, CLECs and Interexchange Carriers will be affected for traffic originating and terminating to and from end office (WHVLTNMTRS0). Direct interconnection for the exchange of voice traffic originating from and terminating to customers served by the WHVLTNMTRPA replacement switch will occur at the MMPHTNMADS0 end office host switch.

The Point Code for WHVLTNMTRPA will be 252-122-009, which is the MMPHTNMADS0 Point Code. Independent LECs, Wireless Service Providers, CLECs, and Interexchange Carriers must evaluate whether their existing trunk groups to MMPHTNMADS0/84T are adequate to handle the WHVLTNMTRPA traffic after the migration is completed.
